## Hi-Tech Hyper 5 Valveless Hammer – HTH500

The HTH500 is valveless DTH Hammer designed for drilling 127mm – 152mm (5" – 6") dia. holes over wide range of operating air pressures. HTH500 hammer is designed to accept Button Bits with a footvalve. This is preferred hammer when drilling 127mm (5") dia. Holes in very abrasive conditions due to its smaller outside diameter. The increased annulus provides marginally lower up hole velocity and reduced wear to the cylinder and chuck.

The HTH500 is supplied with a 3½" API REG. pin Backhead, as standard but other connections are available on request. A positive
